

Copy-milling in CNC quality with hand-held machine

Bevel measure
adjustment

Guide wheel

Milling head with
4 carbide
inserts

Guide plate

M carbide inserts

8-fold applicable
for bevel and radius

Application / Feature

The MULTI-series combines beside a patented milling head quick change system for efficient and economic use a patented spring technology for a vibration-free operation and thus longer tool life. The operator has in addition to the part program of milling head for bevel (0-80°) and for radii (2-4mm) also diamond crowns and abrasive belt heads for effective edge processing.

- Flexible use for processing of bevels and radii on plates, containers, inner and outer edges, contour profiles, drilling and pipe ends
- Milling heads available for all bevel angle
- Efficient milling head quick change system
- Vibration-free operation thanks to spring-loaded drive
- Special spring technology protects the tools
- High stockremoval with minimum effort
- Milling heads for radii=2/3/4 available
- Up to 8 times the normal use of indexable inserts
- Good handling due to compact design
- Ergonomic two-handed operation

Bevel width	1-10 mm
Bevel angle	0-80°
Radius	2-4 mm
Tool set	4
No load speed	2.500-7.500 rpm
Power input	1.500 W
Voltage	230 V
Weight	5,5 Kg
